Professional Summary

Motivated and fast-learning Information Technology student with hands-on experience in full-stack **Web Development**, core programming, and AI-assisted engineering tools. Possesses strong foundational **Problem Solving** capabilities and practical skills in modern **Software Development** workflows. Proven ability to adapt to technical ecosystems and apply proactive **Team Collaboration** principles within technical project structures.

Education

V.S.B. Engineering College

Bachelor of Technology in Information Technology (Current CGPA: 8.19)

Expected Graduation: May 2029

Karur, Tamil Nadu, India

Technical Skills

- **Languages:** Java, Python, C, MySQL, **SQL**, JavaScript, HTML/CSS
- **Frameworks & Web Tech:** React, Node.js, Flask, TypeScript, PLpgSQL, Tailwind CSS, **Responsive Design**
- **Core Competencies:** OOP (Object Oriented Programming), **Frontend Development**, **Backend Development**, **Database Management**
- **Tools & Libraries:** Git, **GitHub**, Google Cloud Platform, Firebase Studio, Cursor AI, VS Code, pandas, NumPy, Matplotlib

Work Experience

Software Engineer Intern

YugaYatra Retail (OPC) Private Ltd

June 2026 – Present

Bengaluru, Karnataka, India (Remote)

- Engaging in full-cycle **Software Development** to design and build modular, responsive web applications leveraging Cursor AI and Firebase Studio.
- Executing robust **Frontend Development** UI adjustments using Canva assets and driving **Team Collaboration** via Google Workspace systems.
- Managing continuous application improvement by implementing thorough local **Testing** protocols and system **Debugging**.
- Strengthening technical **Problem Solving**, agile task ownership, and live e-commerce portal workflow operations.

Java Developer Intern

AXCENTRA

April 2026 – May 2026

Kolkata, West Bengal, India (Remote)

- * Mastered core **Java** syntax and fundamental structural components under robust **Object Oriented Programming (OOP)** guidelines.
- * Handled comprehensive backend **Debugging** and structured unit **Testing** parameters for multiple foundational standalone programs.
- * Engineered localized data persistence logic utilizing relational principles for optimal **Database Management** across multi-class records applications.
- * Gained initial production exposure into standard software modularity, clean code documentation, and active repository management via **Git**.

Key Projects

Helpful-Hearts-AI (Smart Community Help Hub) | *React, TypeScript, Tailwind CSS, Supabase*

- * Architected a scalable full-stack **Web Development** architecture featuring complete end-to-end **Frontend Development** and component reusability.
- * Implemented secure asynchronous custom cloud **API Integration** setups via Supabase to handle encrypted, authenticated platform traffic.
- * Engineered strict structural **Database Management** schemas utilizing robust custom PL/pgSQL data handling routines and relational queries.
- * Optimized platform layouts with modern CSS utilities to guarantee adaptive fluid grids and universal mobile **Responsive Design**.

Achievements

- **Internship Selection:** Successfully selected as a Software Engineer Intern at YugaYatra Retail and a Java Developer Intern at Axcentra during the first year of engineering studies.
- **HackerRank Profile:** Earned a Bronze Badge in Python showcasing early language mastery and computational **Problem Solving**.

Certifications & Coding Profiles

- **Certifications:** NPTEL Fundamentals of OOP (12-Weeks), Infosys Springboard Python Foundation, Google Gemini Certified Student
- **Coding Profiles:** GeeksforGeeks | HackerRank
